

## FS Series Femtosecond Lasers

www.photonix.com

With tens of thousands of lasers shipped worldwide, Photonics Industries introduces its FS Series of femtosecond (fs) lasers. With true fs pulse widths,  $\sim 400$  fs, it delivers the smallest heat affected zone (HAZ) compared to other "sub ps" (e.g.,  $\sim 800$  fs) lasers also marketed as femtosecond lasers. Furthermore, the FS Series lasers, with its new revolutionary packaging has smaller form factor and higher performance compared to other fs laser competitors.

The FS provides from 5W to 100W of IR (GRN, UV and DUV outputs also available) on the simplest, most compact AIO (All-in-One) platform with up to 40MHz PRF output for processing at highest throughput with polygon scanners.

The user-friendly control interface allows Total Pulse Control and Burst Mode operation, where a user selectable number of pulses with adjustable incremental separation and programable amplitude can be released in an envelope, further enabling ablation rate increases on many materials. With adjustable repetition rate, the user can change the operating PRF and change the operating power or pulse energy through PEC (Power or Pulse Energy Control) function on the fly to maximize process flexibility.

### Applications

- Ultrafast high precision cutting, drilling, welding, scribing, marking, intra-marking, patterning, de-paneling, repair
- Flat Panel Display Repair, LCD/LED/OLED Repair
- Hydrophobic Material Manufacturing, Hydrophilic Material Manufacturing, Ultrafast Laser Assisted Etching (ULAE) Systems, Complex 3D Surface Micro-structuring
- Terahertz (THz) Generation, High Harmonic Generation (HHG), X-Ray Generation, OPO Amplifier Systems
- Laser Particle Accelerator Systems
- Angle/Time-resolved Photoemission Spectroscopy Systems, Femtosecond-stimulated Raman Spectroscopy (FSRS) Systems, Multi-photon Fluorescence Microscopy Systems

### Features

- High power laser (up to 100 W in IR) with ultra-short pulse ( $\sim 400$  fs)
- Specifiable pulse width
- Wide range of wavelengths: 1030 nm, 515 nm, 343 nm, and 257 nm available upon request.
- The most compact, rugged, all-in-one fs laser
- Pulse repetition rates up to 40MHz
- Excellent TEM00 beam with typical M2  $\sim 1.2$
- Exceptional Beam Pointing Stability  $< 20 \mu\text{rad}$
- PEC (Power or Pulse Energy Control)
- PSO (Position Synchronized Output) support for external triggering to any arbitrary PRF while maintaining a constant, stable pulse energy with low jitter.
- Burst Mode for individually controllable bursts of pulses with variable separations.
- POD (Pulse-On-Demand), where a burst of pulses with separation equal to the PRF, can be triggered internally, externally, or continuously, while maintaining constant pulse energy.
- Air-cooled option available

Pulse energy (µJ) as a function of pulse repetition rate (kHz)

## Features

## Dimensional Drawings

**FS1-1030-5, FS1-1030-25, and FS1-1030-50**  
**FS1-515-2.5, FS1-515-15, and FS1-515-30**  
**FS1-343-2, FS1-343-10, and FS1-343-15**

Photonics Industries FS Series femtosecond lasers are all-in-one (AIO) and do not require a separate controller or utility module. All connections for operation and control of the laser can be found on the back panel of the AIO laser.

**FS2-1030-75, and FS2-1030-100**  
**FS2-515-40, and FS2-515-55**  
**FS2-343-20, and FS2-343-30**

Due to Photonics Industries' commitment to continuous product improvement, specifications and drawings are subject to change without notice.

Photonics Industries conforms to provisions of US 21 CFR 1040.10 & 1040.11 and is made under one or more US patents listed below: 9,531,147, 8,817,831, 7,869,471, 7,346,092, 7,082,149, 7,079,557, 6,999,483, 6,980,574, 6,961,355, 6,842,293, 6,762,405, 6,690,692, 6,587,487, 6,584,134, 6,366,596, 6,356,578, 6,327,281, 6,246,707, 6,229,829, 6,108,356, 6,061,370, 6,028,620, 5,936,983, 5,898,717 and Pending Patents
